RETHINK! www.wendebank.de

For every season

The innovation for gardens, pedestrian areas, train stations, parks and golf courses: The „Wendebank“, a flippable bench. When it rains its seating surface stays dry and clean. It turns around on its own when it's not in use.

Safe clean sitting – the „Wendebank“

What can you do about dirty benches, uninvited guests, bad and uncomfortable sitting?

The solution is pretty easy: **The „Wendebank“.**

As an exceptional outdoor furniture its seating surface and its backrest always stay clean, because they pivot downwards when nobody is using the „Wendebank“. Due to those movable surfaces you experience a relaxing and comfortable sitting.

The wide range of materials and its workmanship guarantees its durability. These different kinds of sitting will please its users and the countless scopes for design will delight any city planner and architect.
